# PC DRAGONFRAME BLUETOOTH CONTROLLER
SETUP INSTRUCTIONS

1. Find the **Bluetooth** icon in the toolbar, right click it, and choose "Add a Bluetooth Device". This will open "Manage Bluetooth Devices".

2. On the back of the controller, slide the **ON/OFF** switch to **ON**:

3. Press the **CONN.** button with something small, like a pencil tip:

   The blue light on the front of the keypad should begin flashing, and the keypad should appear in the Bluetooth device list.

4. Click **Bluetooth Keypad**, and then click the **Pair** button.

Alternatively, you can connect the keypad to your computer via USB with the provided cord.

We have more help in the Bluetooth section of our FAQ:
